

Wahidyan Kresna Fridayoka

Engineering Leadership | Sharia-Compliant Digital Banking, Fintech & RegTech

Jakarta, Indonesia · wahidyankf@gmail.com · LinkedIn: <https://www.linkedin.com/in/wahidyan-kresna-fridayoka/>

Executive Profile

Engineering leader with nearly nine years of experience delivering and modernising mission-critical digital products, including more than three years in Indonesia's regulated digital banking, Islamic (Sharia-compliant) financial services, and peer-to-peer (P2P) lending sectors. Leads cross-functional teams across backend, frontend, mobile, QA, platform, data, security, and IT governance. Combines technical strategy, regulatory delivery, cost discipline, and people leadership to improve customer outcomes and operating performance.

Selected Impact

- Reduced core-banking operating costs by 95%, equivalent to 30% of Hijra Group's monthly revenue, through a sub-six-month Mambu-to-IBA migration.
- Raised engineering throughput, PR velocity, and resolution rates by 90%+ while keeping OPEX growth within 5%.
- Cut regression testing from 5+ days to under 5 hours and achieved zero production hotfixes.
- Secured ISO 27001:2022, achieved 100% regulatory IT-audit success and zero IT security incidents, and migrated the data warehouse for 100% regulatory compliance.
- Delivered withdrawals across 20,000+ Indomaret stores in 400+ cities; online time-deposit balances grew 39.60% and combined online savings and time-deposit balances grew 16.24% from March 2025 to July 2026.

Experience

Hijra - Jakarta, Indonesia / Hybrid and Remote

Head of Engineering, Hijra Bank | March 2025 - July 2026

- Owned technology strategy for core banking, payments, and financing across Product, Platform, Mobile, SEIT, Data Engineering, Information Security, and IT GRC; accountable for regulatory compliance, board reporting, and audit outcomes.
- Pushed the Direct Switching initiative from inception through UAT; its production release is pending. Open Banking/API capabilities and additional cash-in and cash-out channels remained in planning and initial development.
- Migrated Hijra Bank's data warehouse from the Hijra Group environment for 100% regulatory compliance; secured ISO 27001:2022 and 100% regulatory IT-audit success; advanced eKYC, AML, and fraud detection.
- Maintained zero IT security incidents; strengthened WAF protections, automated reconnaissance, and threat-intelligence capabilities with zero downtime.
- Delivered the Product Engineering Pipeline OKR through an AI-augmented SDLC and a T-shaped delivery model. Two product managers shipped production dashboard UI fixes and code changes through engineer pairing, pull-request review, and test coverage.
- Led development of special-nisbah time-deposit and savings products; from March 2025 to July 2026, online time-deposit balances grew 39.60% and combined online savings and time-deposit balances grew 16.24%. Reduced monthly interbank operating expenses by more than 25% through user tiering without harming month-over-month user growth.

Engineering Manager, Hijra Bank | July 2024 - February 2025

- Led up to 24 engineers across backend, frontend, mobile/React Native, SEIT, and SQA in the Bank domain; also served as IT Executive Officer for regulatory reporting, ISO 27001:2022 certification audits, and IT governance.
- Led the Mambu-to-IBA core-banking migration, delivering a 95% operating-cost reduction in under six months and establishing Hijra Bank's first serious automation-testing process.
- Stabilised the release train and automated all critical business flows, resulting in zero production hotfixes and regression testing reduced from more than five days to under five hours.
- Initiated the Financing Originating System (FOS) to streamline financing operations and reduce Non-Performing Loans.

Engineering Manager, Alami P2P Lending and Hijra Bank Financing | December 2022 - July 2024

- Led teams of up to 25 engineers across Bank and Alami P2P Lending financing, Risk Management & Reporting, and Data Engineering; stabilised delivery through restructuring and strategic reprioritisation.
- Delivered home and commercial financing products, product-engineering back office, onboarding, and sales/risk dashboards - foundational capabilities for a major Hijra Group revenue stream.
- Drove Supply Chain Financing adoption, contributing to 50% of Alami P2P Lending financing-application disbursements; reduced submission-to-disbursement SLA by 25%, from 14 to 10 days.
- Extracted the credit engine for shared Bank and Alami use, saving hundreds of development hours and eliminating application inconsistencies; introduced quality, CI/CD, Kubernetes, and test-automation improvements.

GudangAda - Engineering Manager | July 2022 - December 2022

- Led an 11-person multinational distributed engineering team for the Warehouse Management System.
- Delivered bin-management and paperless warehouse initiatives; invoice automation shortened partner delivery by several days.
- Introduced Cypress and TypeScript web automation and championed frontend-monorepo adoption to improve iteration velocity and maintainability.

Ruangguru - Frontend Engineer to Engineering Manager | October 2017 - July 2022

- Progressed through five roles: Junior Frontend Engineer, Frontend Engineer, Senior Frontend Engineer, Technical Lead, and Engineering Manager; ultimately led Skill Academy's 14-person Payment, Promotion, and Discovery team.
- Delivered a reward and OTP system that supported more than 50% of Skill Academy transactions with a 99% disbursement success rate.
- Increased backend load capacity by more than 200%, improved Android load time by 35%, and increased organic traffic more than sixfold while reducing monthly advertising spend.

Selected Independent Projects

Built alongside full-time engineering-leadership roles; public projects only.

Open Sharia Enterprise (OSE) | December 2025 - Present

- Building in public an open-source platform for trustworthy, Sharia-compliant enterprise systems, including OrganicLever, a productivity-tracker foundation; OSE Primer, a reusable starter for well-governed polyglot software projects; and AyoKoding, a learning-in-public knowledge-sharing site grounded in enterprise-system work. GitHub: <https://github.com/wahidyankf/ose-public> | AyoKoding: <https://ayokoding.com>

BeaverNest | Early stage

- Building the technical foundation for a self-owned personal operating layer for assistant, content, and workflow tools; user-facing capabilities remain on the roadmap. GitHub: <https://github.com/wahidyankf/beaver-nest>

Education

Bachelor of Engineering, Electrical and Electronics Engineering Institut Teknologi Bandung | July 2005 - July 2011 | GPA: 3.0

Honors

- Hijra Keep On Moving Awards 2025: Outstanding Cost-Slasher, Hijra, October 2025
- Certificate of Appreciation: Hijra Group's Exceptional Performer, Hijra Group, May 2024
- Ruangguru Chief of The Month, September 2019 and August 2018

Core Competencies

Engineering leadership · Digital banking · Core-banking migration · Financial-product engineering · Regulatory IT governance · ISO 27001 · Information security · Systems design · Developer productivity · Quality engineering · CI/CD · Platform modernisation · React/React Native
